## **REVISION: CLIMATOLOGY 20 MARCH 2014 Lesson Description**

Geomorphology and Climate. The driving forces that influence climate act as significant agents in the exogenic processes that operate at or near the Earth's surface. "The landforms of the earth are the result of the interplay between internal, or endogenetic processes, and surface, or exogenetic, processes" ( Derbyshire, 1997, p. 89).

Climate and weather and fluvial processes can be tested in mapwork. When studying theory learners need to incorporate the relevant map work sections at the same time and not study them separately. A proper knowledge of theory is needed when answering these sections in mapwork. This is the reason why both papers are

Friday 26th September 2014 A long silence my friends .... many apologies. But I've been busy. Teaching, marking ('grading' in the US vernacular), administration, conferences, fieldtrips, a fleeting holiday ..... then back to teaching, marking, administration .... the academic merry-go-round never ceases. More on some of these activities at a later date.

## **10 Reasons Why Geomorphology Is Important - stephentooth**

Geomorphology is the science of landforms, with an emphasis on their origin, evolution, form, and distribution across the physical landscape. Understanding geomorphology is therefore essential to understanding one of the most popular divisions of geography.

## **A Summary of Geomorphology and Its Processes**

Geomorphology (from Ancient Greek: γῆ, gē, "earth"; μορφή, morphé, "form"; and λόγος, lógos, "study") is the scientific study of the origin and evolution of topographic and bathymetric features created by physical, chemical or biological processes operating at or near the Earth's surface. Geomorphologists seek to understand why landscapes look the way they do, to understand ...

## **Geomorphology - Wikipedia**

Geomorphology is the study of the Earth's diverse physical land surface features and the dynamic processes that shape these features. Examining natural and anthropogenic processes, The SAGE Handbook of Geomorphology is a comprehensive exposition of the fundamentals of geomorphology that examines form, process, and history in the discipline.
