This paper examines the evidence for specialist artefact production during the later Neolithic on the Yorkshire Wolds. It is proposed that such an industry was responsible for the production of some of the highly distinctive lithic artefacts present in that period, such as polished discoidal knives, ripple-flaked and polished oblique arrowheads, and polished flint axes.

The production of specialised flintwork in the later ...
This paper examines the evidence for specialist artefact production during the later Neolithic on the Yorkshire Wolds. It is proposed that such an industry was responsible for the production of some of the highly distinctive lithic artefacts present in that period, such as polished discoidal knives, ripple-flaked and polished oblique arrowheads, and polished flint axes.

The Prehistoric Society - Book Review
In his Prehistoric FlintworkChris Butler sets out to provide a basic guide to the types of flint artefacts and the technology which produced them, charting the changes in both technology and tools throughout prehistory. After a brief introduction to the formation of flint, its sources, and the

Flint - Wikipedia
Flint blade from Lithic reduction - Upper Paleolithic - Brassempouy, France - Muséum of Toulouse In archaeology, a blade is a type of stone tool created by striking a long narrow flake from a stone core. This process of reducing the stone and producing the blades is called lithic reduction.

Prehistoric flintwork in Britain (Book, 1981) [WorldCat.org]
Finds of prehistoric flintwork and pottery during the excavation, and of material of later date, together with the observation of earthworks and historical research, have been used to show the place of the pottery kilns as an element in the exploitation of the woodland of northern London over the last eight thousand years.

Archaeopress: Publishers of Academic Archaeology
Overview. Cumbria was created as a county in 1974 from territory of the historic counties of Cumberland, Westmorland, Lancashire North of the Sands and a small part of Yorkshire, but the human history of the area is ancient.it is a county of contrasts, with its mountainous central region and lakes, fertile coastal plains in the north and gently undulating hills in the south.
