### Trouble Shooting Mercruiser Engine Circulating Pump

To troubleshoot, install a section of clear water hose at the input to the thermostat housing. If the boat is on a trailer, attach a garden hose and ear muffs to the raw water intake on the lower unit. Start the engine. If the impeller is not working, no water movement will be seen through the clear hose.

Topic: Water Pump Failures Question: My Mercruiser Marine Engine suddenly started overheating to the point I'm afraid to run the engine. I watched your video on replacing the water pump impeller and in fact narrowed my problem down to a failed water pump impeller on my 807151A14 water pump impeller. However after replacing the impeller the engine is still overheating.
