If you don't have the beacon or the handshake, it will fail accordingly. For wordlists, see below. Deauth. As I said, aireplay-ng doesn't work on a MacBook Pro. The catch is that aireplay-ng can do a lot of other things besides deauth attacks.. You might read that airport cards do not support packet injection, but packet injections are for WEP attacks and nobody uses WEP anymore.

### **WPA wifi cracking on a MacBook Pro with deauth**

Hacking WiFi Networks with WEP, WPA and WPA2 PSK Security As security features have been improved from WEP to WPA to WPA2 PSK WiFi authentication protocol, so obviously, WEP WiFi networks are very easy to hack compared to WPA and WPA2 PSK Security methods. Almost every password-protected WiFi networks support both WPA/WPA2 PSK authentication.
